

FitZone Gym & Class Booking System

ITUE301 · Open-Book Practical Examination · Set B · 24/08/2026

Roll No:24CE031 Batch: B1

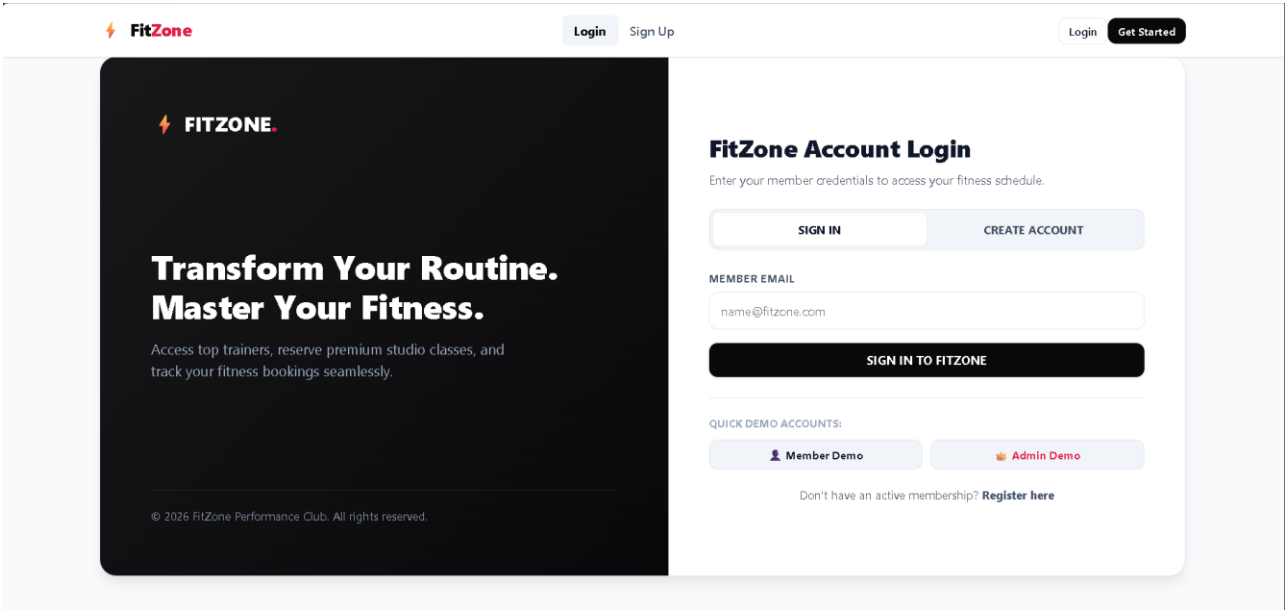

1. Implementation Summary

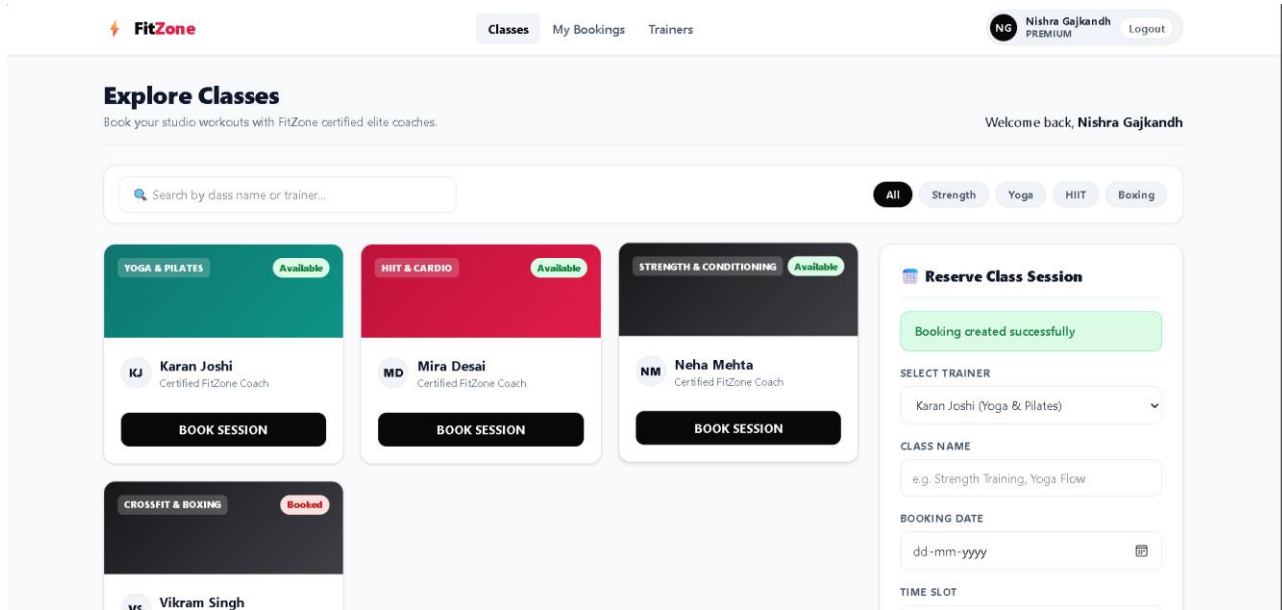

React frontend + Express/Mongoose backend with protected routing, AuthContext, lazy-loaded Admin Panel, reusable TrainerCard, API-driven trainers, loading/error states, client-side specialization search, JWT authentication, request logging, validation, booking creation, populated booking retrieval, and booking status updates.

2. Required API Endpoints

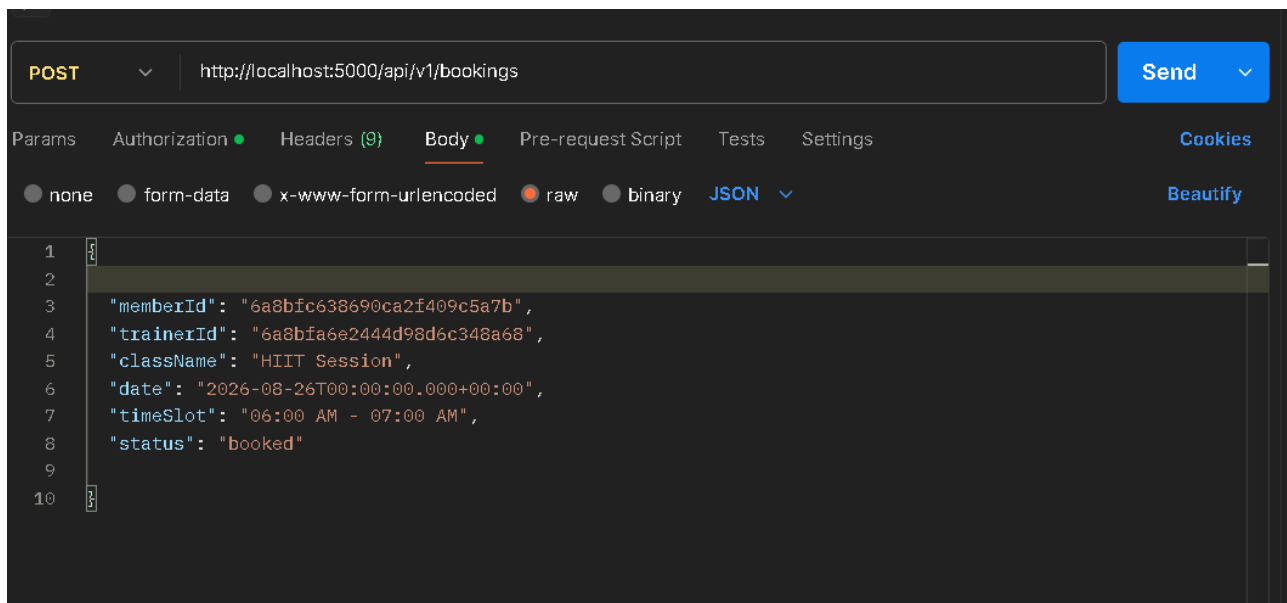

Method	Endpoint	Purpose
POST	/api/v1/auth/login	Authenticate member and issue JWT
GET	/api/v1/trainers	Public trainer listing
POST	/api/v1/bookings	Create protected booking
GET	/api/v1/bookings/my	Get logged-in member bookings
PATCH	/api/v1/bookings/:id/status	Update protected booking status

3. Required Screenshot 1: ClassesPage with Trainer Cards

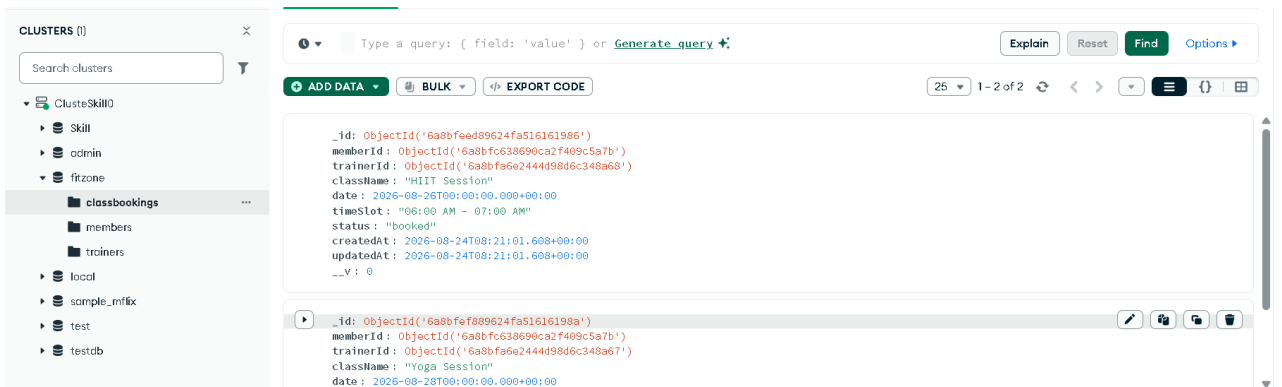

4. Required Screenshot 2: Postman Booking Creation

5. Required Screenshot 3: MongoDB Saved Document
